Programme

Maximum number of attendees is fixed in 30 people (including the 5 organizers).

29 July

Accommodation and lunch at Rifugio Federico located in Val Viola, Upper Valtellina (SO) (www.rifugiofederico.it).

First survey of the area with the whole group.

30-31 July

Field work organized in three different groups:

- a) Reconstruction of the deglaciation history and human evidences: this group will work around the Pass in order to do the geomorphological, pedological and vegetational map of the area also through the use of different dating methods (e.g. Schmidt hammer).
- b) Rock glacier: this group will work on the geomorphological, pedological, vegetational and geophysical characterization of one large rock glacier.
- c) Limnological group: this group will work on the geomorphological pedological and vegetational characterization of a lake catchment basin in order to do at least one core. Possibly also in this case geophysical prospection will be used to define the depression morphology and eventually the stratigraphy of the sediments.

1 August

Workshop “Towards a multidisciplinary approach for monitoring and protecting the high mountain landscape in a CC scenario”.

The venue of the workshop is located at Bormio (SO) Via Roma (sala Banca Popolare di Sondrio).

The workshop program will be:

9.30- 9.45 Introduction

9.45-10.30 Presentation of the results: part a

10.30-10.45 coffee break

10.45-11.30 Presentation of the results: part b

11.30-12.15 Presentation of the results: part c

12.15-13.00 Discussion

EUR 250.00- (registration fee includes the half board for 29 July, the full board for days 30 and 31 July , the breakfast and the lunch of 1 August, the transfers between Bormio and Rifugio Federico and return and coffee break for the workshop).

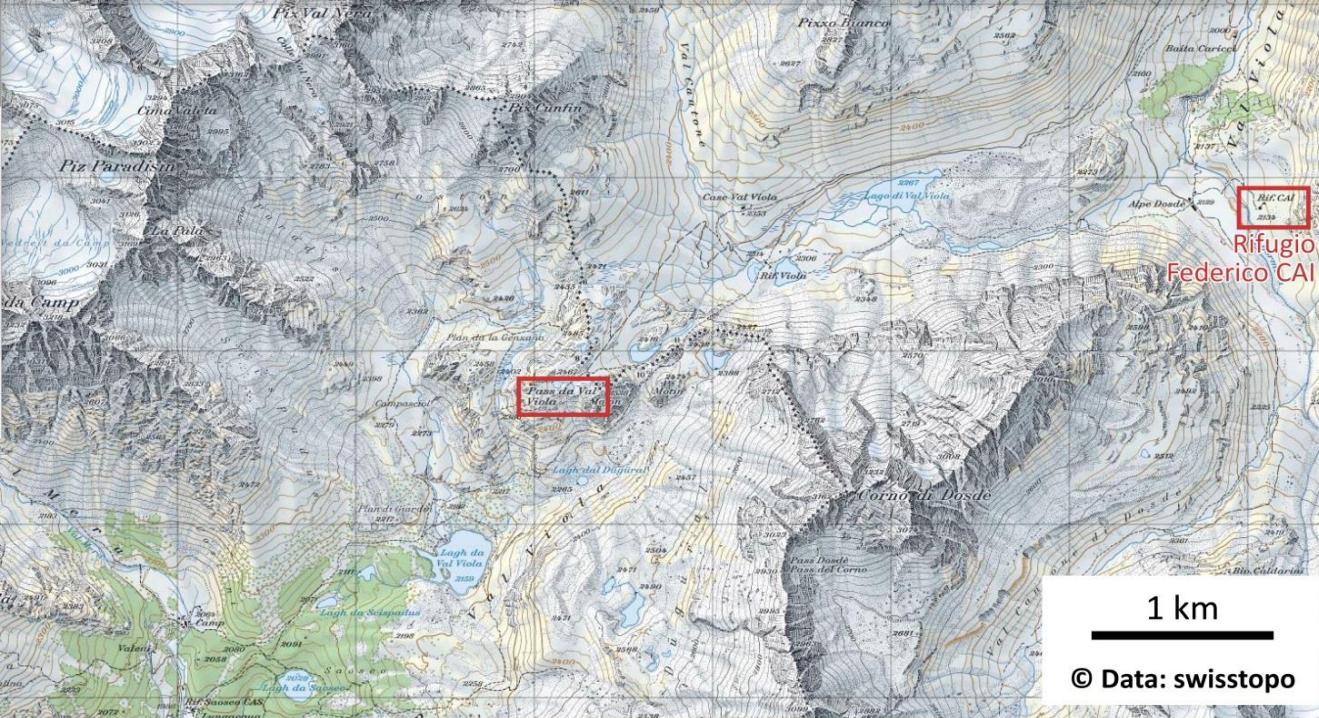

Please send to mauro.guglielmin@uninsubria.it and to Cristian.scapozza@supsi.ch and to infosegreteria@aigeo.it the module attached in the last page before the deadline of 30 May 2016.

Payment is due to:
