

17th Swiss Global Change Day

List of Posters

Atmosphere / Hydrosphere

01 Atmosphere / Hydrosphere

The Taylor Glacier ablation zone: A well dated archive of ancient air
Daniel Baggemos (Universität Bern)

02 Atmosphere / Hydrosphere

Verification of extreme wind gusts in COSMO-2
Hélène Barras, Simona Trefalt and Olivia Martius (Universität Bern)

03 Atmosphere / Hydrosphere

Bipolar CH₄, δ¹³CH₄ and δD(CH₄) measurements over the Holocene
Jonas Beck, Barbara Seth (Universität Bern)

04 Atmosphere / Hydrosphere

Mean Ocean Temperature during the last Glacial Transition: Implications for the "climate hiatus"
Bernhard Bereiter, et.al (Universität Bern)

05 Atmosphere / Hydrosphere

Cloud Effect on Temperature Profiles from Microwave Measurements
Leonie Bernet, Francisco Navas-Guzman and Niklaus Kämpfer (Universität Bern)

06 Atmosphere / Hydrosphere

Extreme Winter Cyclones in the North Atlantic in a Last Millennium Climate. Simulation with CESM1.0.1
Sandro Blumer (Universität Bern)

07 Atmosphere / Hydrosphere

Measuring methane, nitrous oxide and carbon dioxide from a single polar ice core sample using a new wet extraction technique
Michael Bock (Universität Bern)

08 Atmosphere / Hydrosphere

Multiple equilibria as a possible mechanism for decadal variability in the North Atlantic Ocean
Andreas Born (Universität Bern)

09 Atmosphere / Hydrosphere

tba
Aleksandra Borodina (ETH Zürich)

10 Atmosphere / Hydrosphere

Teleconnection Stability over the Last Millennium
Dätwyler Christoph (Universität Bern)

11 Atmosphere / Hydrosphere

Effect of particulate matter on the albedo of Alpine glaciers

Anna Dal farra, Margit Schwikowski (PSI)

12 Atmosphere / Hydrosphere

Matlab based automatization of an inverse surface temperature modelling procedure for Greenland ice cores using an existing firn densification and heat diffusion model

Michael Döring, T. Kobashi, P. Kindler, M. Guillevic and M. Leuenberger (Universität Bern)

13 Atmosphere / Hydrosphere

High-resolution NGRIP total air content record sensitive to insolation and rapid DO-warnings

Oliver Eicher, M. Baumgartner, A. Schilt, J. Schmitt, J. Schwander, T.F. Stocker and H. Fischer (Universität Bern)

14 Atmosphere / Hydrosphere

Towards reliable continuous particle records from polar ice cores: A continuous flow Coulter Counter and interpretation of high-resolution particle measurements

Tobias Erhardt (Universität Bern)

15 Atmosphere / Hydrosphere

tba

Tracy Ewen (Universität Zürich)

16 Atmosphere / Hydrosphere

Interannual variability and Ocean Acidification in the Humboldt Current System

Ana Cristina Franco Novela (ETH Zürich)

17 Atmosphere / Hydrosphere

ENSO and the fate of coastal production in the California Current System from 1979 to 2015

Martin Frischknecht, Matthias Münnich, Elisa Lovecchio, David Byrne and Nicolas Gruber (ETH Zürich)

18 Atmosphere / Hydrosphere

Management matters:

Testing a mitigation strategy for greenhouse gas emissions on intensively managed grassland

Kathrin Fuchs, Lutz Merbold and Nina Buchmann (ETH Zürich)

19 Atmosphere / Hydrosphere

Anthropogenic climate change affects meteorological drought risk in Europe

Lukas Gudmundsson (ETH Zürich)

20 Atmosphere / Hydrosphere

Variability of Dissolved Oxygen Over the last Millennium With CESM

Angélique Hameau, Fortunat Joos, Juliette Mignot and Kathrin Keller (Universität Bern)

21 Atmosphere / Hydrosphere

Reconstruction of late Holocene Greenland temperatures from argon and nitrogen isotopes entrapped in NorthGRIP ice

Aurich Jeltsch-Thoemmes, Takuro Kobashi, Michel Döring and Markus Leuenberger (Universität Bern)

22 Atmosphere / Hydrosphere

Model-specific variability of ocean biogeochemistry in Earth system models

Kathrin Keller (Universität Bern)

23 Atmosphere / Hydrosphere

A Return Glider Radiosonde to measure Radiation Profiles through the Atmosphere

Andreas Kräuchi, Rolf Philipona and Rigel Kiwi (ETH Zürich)

24 Atmosphere / Hydrosphere

Variability of mesospheric water above Bern in relation to the 27-day solar rotation cycle

Martin Lainer (Universität Bern)

25 Atmosphere / Hydrosphere

Warming of the world's lakes: Interdecadal variability and long-term trends from 1910-2009 using in situ and remotely sensed data

John Lenters (LimnoTech)

26 Atmosphere / Hydrosphere

Long-range offshore transport of Organic Carbon from the Canary U.S. to the open North Atlantic

Elisa Lovecchio, Martin Frischknecht, David Byrne, Matthias Münnich and Nicolas Gruber (ETH Zürich)

27 Atmosphere / Hydrosphere

Deciphering the greenhouse gas record in deepest ice using novel continuous sublimation extraction/laser spectrometry

Lars Mächler (Universität Bern)

28 Atmosphere / Hydrosphere

Sensitivity Experiments on the Impact of Vb-Cyclones to Ocean Temperature and Soil Moisture Changes

Martina Messmer, Juan José Gomez-Navarro and Christoph C. Raible (Universität Bern)

29 Atmosphere / Hydrosphere

Decadal prediction skill with surface nudging

Juliette Mignot, et. al. (Universität Bern)

30 Atmosphere / Hydrosphere

Natural variability in stratospheric ozone observed by GROMOS

Lorena Moreira (Universität Bern)

31 Atmosphere / Hydrosphere

Validation of stratospheric temperature profiles from a ground-based microwave radiometer with other techniques

Francisco Navas Guzman (Universität Bern)

32 Atmosphere / Hydrosphere

Controlling Factors of Coccolithophore Biogeography in a Regional Model of the Southern Ocean

Cara Nissen, M. Vogt, M. Münnich and N. Gruber (ETH Zürich)

33 Atmosphere / Hydrosphere

Carbon balance indicates a time limit for cultivation of organic soils in central Switzerland

Sonja Paul (Universität Basel)

34 Atmosphere / Hydrosphere

Consequences of 21st century policy for long-term sea level rise

Patrik Pfister, Thomas F. Stocker (Universität Bern)

35 Atmosphere / Hydrosphere

Raising interest in issues related to declining water resources

Stéphanie Piffeteau, Martin Beniston and Markus Stoffel (Université de Genève)

36 Atmosphere / Hydrosphere

tba

Christoph Raible (Universität Bern)

38 Atmosphere / Hydrosphere

On the relationship between fog and low stratus (FLS) and weather types on the Swiss Plateau

Yasmin Rosskopf, Simon C. Scherrer (MeteoSchweiz)

39 Atmosphere / Hydrosphere

On the relation between regional jet waviness and daily weather extremes

Matthias Röthlisberger, Stephan Pfahl and Olivia Martius (Universität Bern)

40 Atmosphere / Hydrosphere

Ocean heat uptake and climate sensitivity

Maria Rugenstein, Ken Caldeira and Reto Knutti (ETH Zürich)

41 Atmosphere / Hydrosphere

Temperature-driven gas adsorption and desorption on high pressure standard cylinders

Ece Satar (Universität Bern)

42 Atmosphere / Hydrosphere

1) Fog and low stratus over the Swiss Plateau - a climatological study

2) Moderate extremes of daily & hourly precipitation: Trends in observed Swiss data

Simon Christian Scherrer (MeteoSchweiz)

43 Atmosphere / Hydrosphere

Analysis of solar influence on tropospheric weather using a new time series of weather types

Mikhaël Schwander, Stefan Brönnimann (Universität Bern)

44 Atmosphere / Hydrosphere

Measuring methane, nitrous oxide and carbon dioxide from a single polar ice core sample using a new wet extraction technique

Jan Strähl (Universität Bern)

45 Atmosphere / Hydrosphere

Reconstruction of glacial-interglacial changes in export production patterns in the Southern Indian Ocean

Lena Thöle (University of Bern)

46 Atmosphere / Hydrosphere

The highly variable nitrogen cycle in the Pacific Ocean

Simon Yang, Nicolas Gruber (ETH Zürich)

47 Atmosphere / Hydrosphere

The Barsem debris flow disaster, Pamir (Tajikistan) - a signal for effects of climate change?

Markus Zimmermann (NDR Consulting GmbH)

48 Atmosphere / Hydrosphere

not yet delivered

Elias Zubler (ETH Zürich)

49 Atmosphere / Hydrosphere

How moisture recycling is related to the atmospheric moisture transport distance

Alexander Läderach, Harald Sodemann (ETH Zürich)

50 Atmosphere / Hydrosphere

Two years of greenhouse gas monitoring at a remote site in NW Viet Nam: A first overview

Nhat Anh Nguyen (Gastwissenschaftler Empa)

51 Atmosphere / Hydrosphere

Variations in UV radiation in Chile over the last decade

Solangela Edit Sanchez Cuevas (Gastwissenschaftlerin Empa)

52 Atmosphere / Hydrosphere

Seasonal Forecasts of Climate Indices: Impact of Definition and Spatial Aggregation on Predictive Skill.

Jonas Bhend (MeteoSchweiz)

53 Atmosphere / Hydrosphere

Is monthly sampling sufficient for reliably estimating lake surface temperature trends?

Martin Schmid (EAWAG)

Geosphere / Biosphere / Biodiversity

01 Geosphere / Biosphere / Biodiversity

Paleolimnological analysis of Ecuadorian sediment cores.

Stephanie Arcusa (Universität Bern)

02 Geosphere / Biosphere / Biodiversity

Not all alpine plants are of small stature:

Do exceptionally tall forbs differ in biomass and non-structural carbohydrate allocation?

Jonas Arnaiz, Erika Hiltbrunner (Universität Basel)

03 Geosphere / Biosphere / Biodiversity

Probabilistic Estimates of Marine N₂O Emissions

Gianna Battaglia, Fortunat Joos (Universität Bern)

04 Geosphere / Biosphere / Biodiversity

Biochar from human feaces and other feedstocks.

A Characterisation.

Mira Bleuler, Andreas Schoenborn and Nicola Bulant (Zürcher Hochschule für Angewandte Wissenschaften)

09 Geosphere / Biosphere / Biodiversity

European lianas may benefit from increasing CO₂ and temperature

Rubén Delgado Manzano, J. Ballesteros-Canovas, F. Schenk, M. Stoffel, M. Fischer and E. Allan (Universität Bern)

05 Geosphere / Biosphere / Biodiversity

Stem diameter variations of Central European forest tree species reflect the species' water status

Lars Dietrich, Ansgar Kahmen (University of Basel)

06 Geosphere / Biosphere / Biodiversity

Paleolimnological analysis of Ecuadorian sediment cores

Lea Fränkl, S. Arcusa, T. Schneider and M. Grosjean (Universität Bern)

07 Geosphere / Biosphere / Biodiversity

Modeling SOM dynamics in Swiss forest soils: can land-use history and physico-chemical properties explain the residuals measured SOC stocks?

Sia Gosheva, M. Didion, L. Walther, S. Zimmermann, Niklaus P.A., Thürig E. and Hagedorn F. (WSL)

08 Geosphere / Biosphere / Biodiversity

DGVM using observational constraints in a Monte Carlo Framework (Working Title)

Sebastian Lienert, Stefan Klesse, Renato Spahni, David Frank and Fortunat Joos
(Universität Bern)

10 Geosphere / Biosphere / Biodiversity

Snowbeds are particularly affected by climate change in the Swiss Alps

Magali Matteodo, Klaus Ammann, Eric Verrecchia and Pascal Vittoz (Université de Lausanne)

11 Geosphere / Biosphere / Biodiversity

Is climate change impacting water yield and sediment export in the Alps?

Natan Micheletti, Stuart N. Lane (Université de Lausanne)

12 Geosphere / Biosphere / Biodiversity

Source to sink element geochemistry and clay mineralogy in Lake Towuti, Indonesia: understanding climate-induced controls on sediment composition during the past 60 kyr BP

Marina Morlock (Universität Bern)

13 Geosphere / Biosphere / Biodiversity

Glacial-Interglacial and Holocene N₂O stable isotope changes constrain terrestrial N cycling

Jochen Schmitt (Universität Bern)

14 Geosphere / Biosphere / Biodiversity

Is tree diversity key in providing ecosystem services on a landscape scale?

Laura Schuler (ETH Zürich)

15 Geosphere / Biosphere / Biodiversity

The forest water balance – which role does the herbaceous understorey play?

Timothy Thripleton (ETH Zürich)

16 Geosphere / Biosphere / Biodiversity

Controls of carbon reserves in temperate trees at long-term carbon limitation

Raphael Weber, Günter Hoch (Universität Basel)

17 Geosphere / Biosphere / Biodiversity

Cellulose Content in Tree Rings - A comparison of Larix

decidua Mill. and Pinus cembra L. from the Holocene and the Anthropocene

Malin Michelle Ziehmer, Kurt Nicolussi, Christian Schlüchter and Markus Leuenberger (Universität Bern)

18 Geosphere / Biosphere / Biodiversity

Seasonal droughts and their different effects on grassland productivity

Claudia Hahn, S. Hasler, F. Cueni, A. Lüscher and A. Kahmen (University of Basel)

19 Geosphere / Biosphere / Biodiversity

Comparison of climate and ocean dynamics during the last and the current interglacial: Lessons for the future?!

Julia Gottschalk, Oeschger Centre, University of Bern

Human Dim. / Sustainability

01 Human Dimensions

Paradigm shifts in the Swiss flood prevention

Alexandra Gavilano (Universität Bern)

03 Human Dimensions

Adapting to adaptation in the South

Marc Hufty (Graduate Institute of International and Development Studies)

04 Human Dimensions

Risk and Resilience Cluster: Addressing challenges of greater mountain regions from a multi-dimensional and dynamic perspective

Jorge Ramirez (Universität Bern)

05 Human Dimensions

Predictors of national CO2 emissions: Do international commitments matter?

Sebastian Mader (Universität Bern)

06 Human Dimensions

Communicating Climate Sciences with the Public: Engaging Citizens alongside Scientists

Claudia Mignani, et. al (MSB Climate Science Communication GmbH)

07 Human Dimensions

Scenarios of human vulnerability to climate change-induced heat stress in Europe

Guillaume Rohat, Johannes Flacke and Hy Dao (Université de Genève)

08 Human Dimensions

Char-up & Decarbonize!

The potential multi-role of biochar - reducing climate change and increasing resilience of soils

Martin Schmid (Ökozentrum Langenbruck)

Organisation

01 Organisation

MeteoSchweiz Poster

Erika Kienast (MeteoSchweiz)

02 Organisation

Past Global Changes Poster

Lucien von Gunten (PAGES IPO)

03 Organisation

EuResearch Poster. Climate Change, Environment, Resource Efficiency and Raw Materials.

Judith Zbinden (Euresearch Head Office)
