

# Biology week

## Neurosciences and molecular biology

3-7 August 2026

The Life Science Learning Center in Zurich opens its doors to you! For five days, you will discover more about the human brain and neuroscience imaging techniques.

The courses this year will be about:

- ✓ Neurostimulation
- ✓ Brain imaging and monitoring
- ✓ Synaptic plasticity
- ✓ Sleep research

You will get answers to all of those questions and many others!

This week of scientific discoveries is offered by the Swiss Academy of Sciences (SCNAT) for young people all over Switzerland eager to learn!

Place: Zurich

Date: 3-7 August 2026

Who can

participate: High school students who will pass their high school diploma (maturity) in 2026, 2027 or 2028.

Language:

The courses will be held in English. A good understanding of English is necessary, but it is not necessary to be fluent.

Costs:

The course is free. Accommodation at the Zurich Youth Hostel, meals and all travel expenses by public transport will be covered by SCNAT.

Registration:

Register before **13th of May 2026, 12:00**, by filling the form on our website and sending your application to [biologyweeks@scnat.ch](mailto:biologyweeks@scnat.ch).
