

Friedrich Miescher Institute
for Biomedical Research

The Friedrich Miescher Institute for Biomedical Research (FMI), based in Basel, Switzerland, is a world-class biomedical research institute dedicated to understanding the molecular mechanisms of health and disease. We are looking for a

Laboratory Animal Manager (100%)

The successful applicant will be responsible for taking care of laboratory animals (mice), management of breeding colonies and collection of samples (for e.g. genotyping or biochemical analyses). You will act as the liaison between the animal facility and the scientists in the research groups. You will be responsible for data recording using an electronic database and will assist in general logistics.

The ideal candidate received certified training in animal husbandry and has several years of experience in laboratory animal management including animal hygiene. You are organized, efficient, flexible and take responsibility while working alone or in a team. Moreover, you are fluent in English and German or French, and experienced in using computer programs like MS Office and Outlook. Basic knowledge in Molecular Biology will be an advantage.

You can expect a job with major responsibilities in an exceptional research environment. You will be part of a motivated research team and will receive advanced employment conditions. The position is available from March 1st, 2021 onwards.

We look forward to receiving your complete application documents (motivation letter, curriculum vitae including certificates and employment references) online via www.fmi.ch/opening.

For further information contact Dr. Gisèle Ferrand gisele.ferrand@fmi.ch.
