

Excursion of the Swiss Young Geomorphologists (SGmS)

Management of natural risks in Fribourg

Bridging science and society

11 February 2022

© Service des forêts et de la faune, 2017

In February, the Young Geomorphologists representatives propose an excursion in and around the city of Fribourg. Geologists and engineers from the company Geotest will accompany us to discuss about stakeholders in the management of natural risks. This excursion aims to give some insight on the application of the fields of geomorphology and geology for society from the perspective of different stakeholders.

From the Gottéron valley to the medieval town of Fribourg, we will have the opportunity to discuss the assessment of hazards and risk and as well as the measures taken to mitigate and monitor natural risks based on case studies.

Programme

Friday 11 February 2022

Meeting point at the train station in Fribourg at **09:00**

Visit of the Gottéron valley (rockfall)

Visit of the Gottéron bridge (infrastructure and rock face instability)

Visit of the Terrasse du Belvédère (infrastructure and rock face instability)

End of the excursion at **16:00**

Practical information

Cost The excursion is free of charge for all participants

Not included Public transportation ticket and lunch

Registration is open until the 31st of January via the attached registration form that needs to be returned to young@geomorphology.ch (or julie.wee@unifr.ch and jonathan.bussard@unil.ch)

Non-members of the SGmS are very welcome!

Organisers

Julie Wee and Jonathan Bussard
