

Aquatic Invertebrates of the Col de Jaman area

Oliver Heiri, University of Bern

Maarten van Hardenbroek, Newcastle University

Col de Jaman - site overview

Plastic drinking trough 1

Macroinvertebrates: 4

Diptera: 3 (75%)

Chironomidae: 2

Plastic drinking trough 2

Macroinvertebrates: 8
Diptera: 5 (63%)
Chironomidae: 4

Wooden drinking trough

Macroinvertebrates: 1

Diptera: 1 (100%)

Chironomidae: 1

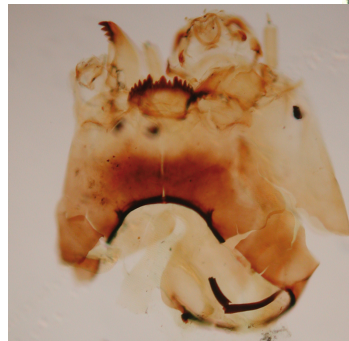

Road drain (SH1)

Macroinvertebrates: 3

Diptera: 2 (67%)

Chironomidae: 1

Stream (lower)

Macroinvertebrates: 15

Diptera: 13 (87%)

Chironomidae: 10

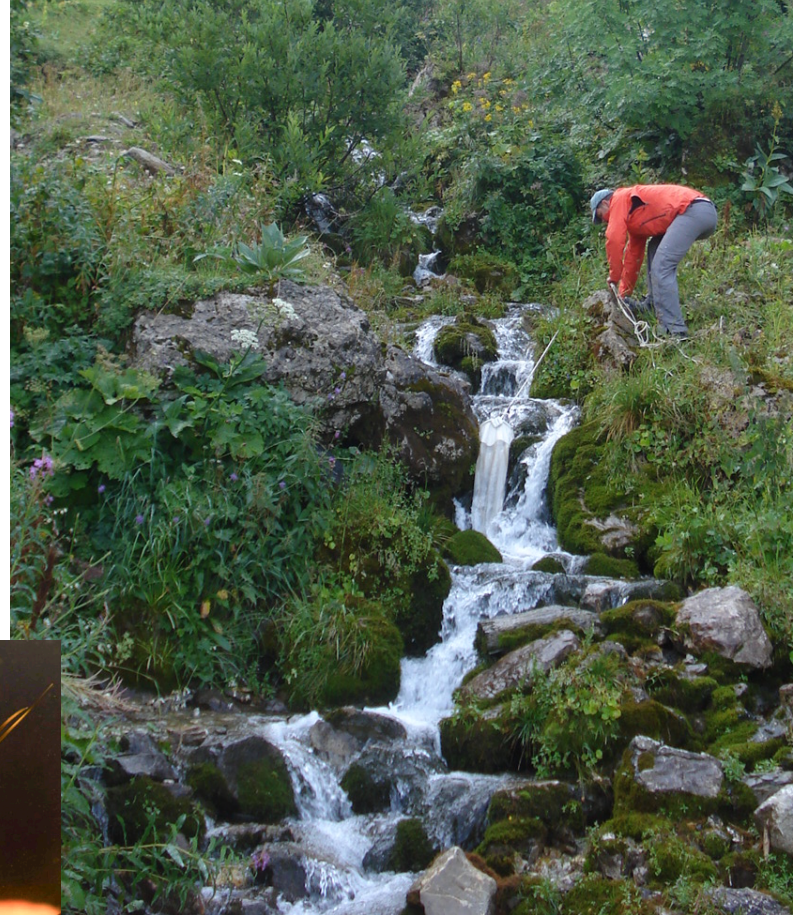

Stream (upper)

Macroinvertebrates: 22

Diptera: 14 (63%)

Chironomidae: 9

Macroinvertebrates: 35
Diptera: 25 (71%)
Chironomidae: 17 (49%)

Plastic drinking trough 1

Plastic trough 2

Road drain

Wooden drinking trough

Stream (lower)

Stream (upper)

An aerial photograph of a mountainous landscape. The terrain is a mix of green grassy slopes and dense evergreen forests. A road with a parking lot and some buildings is visible in the center. Several sampling sites are marked with white arrows and labels: 'Plastic drinking trough 1' points to a small white structure on a slope; 'Plastic trough 2' points to another similar structure further down; 'Road drain' points to a ditch along the road; 'Wooden drinking trough' points to a structure near the road; 'Stream (lower)' and 'Stream (upper)' point to a stream flowing through a forested area on the right. In the bottom right foreground, there is a large, light-colored rock outcrop.
