

SSS-Day 2016

Program

Friday 11 Nov. 2016: Sion

Salle des Arsenaux

(Médiathèque Valais, Rue de Lausanne 45)

09.45	Registration & Coffee
10.10	Welcome address
10.15	Invited lecture – Jean Mariaux (Geneva): So many tapeworms, so little time... (and the need to think big in systematics)
11.00	Luiz Jardim de Queiroz (Geneva): Fish diversification in the Amazon: the contribution of environmental heterogeneities, topographical barriers and geographical distance
11.10	Lucie Garnier (Geneva): Systematics, species delimitation and conservation in a Madagascar endemic genus of Sapotaceae
11.20	Jon Peder Lindemann (Oslo): Several species in one - An inventory of Norwegian species of <i>Pteromalus</i> (Hymenoptera: Pteromalidae) associated with Asteraceae plants
11.30	Ivan Löbl (Geneva): Electronic-only papers: the unforeseen side effects
11.50	Donat Agosti (Bern): TreatmentBank: a growing service to taxonomic information
12.00	General Assembly of the SSS
12.30	Lunch at Restaurant le Trait d'union
14.00	Invited lecture – Frederik Ronquist (Stockholm): Recent progress in dating phylogenies with fossils
14.45	Tamara Spasojevic (Bern): Leave no stone unturned: challenges in Ichneumonidae palaeontology
14.55	Jana Flury (Bern): The unexpected diversity of the genus <i>Occidozyga</i> on Borneo
15.05	Christophe Randin (Lausanne): Ecological niche models to help unraveling the evolution of vascular plants since the Last Glacial Maximum
15.25	Coffee break
16.10	Toprak Zeynep (Geneva): Species Delimitation In the age of Genomics: A Case Study of <i>Silene</i> Section Siphonomorpha (Caryophyllaceae)
16.20	Master prize presentation – Lea Waser (Bern): From a lost world: phylogeny of the genus <i>Ansonia</i> Stoliczka, 1870 (Lissamphibia: Anura: Bufonidae) and the description of a new species including its morphometric discrimination
16.40	Clément Duckert (Neuchâtel): Morphological and molecular taxonomy of <i>Euglypha</i> - Towards a calibration of the molecular clock
16.50	Alice Gerlach (Geneva): The corticolous, shrubby, apotheciante species of <i>Usnea</i> Adans. (lichenized Ascomycetes, Parmeliaceae) of Brazil: an integrative taxonomy approach
17.00	End of SSS-Day

About the venue: Salle des Arsenaux

The SSS-Day 2016 is hosted by the Musée de la nature du Valais.

The museum does not have a large room to accommodate the workshop and meeting, and provided access to the Salle des Arsenaux, at the Médiathèque du Valais – Sion, 45 rue de Lausanne.

A guided tour of the museum's exhibition «Objectif Terre: Vivre l'Anthropocène» will be proposed Thursday evening.
