Values

innovation

fairness

partnerships

responsibility

Research Areas

- Social Justice
- Health and well-being
- Sustainable Environments

Partners

International Service
making change together

‘Applying interdisciplinary expertise to research, teaching and partnerships, the IGDC addresses global development challenges in innovative ways. We aim to create sustainable change that directly benefits communities in developing countries around the world.’

Global Challenges Research Fund (GCRF)

- 2015-22: funded by UK's ODA budget
- promote challenge-led disciplinary and interdisciplinary research
- strengthen capacity for research, innovation and knowledge exchange in the UK and developing countries through partnerships
- provide an agile response to emergencies where there is an urgent research need.

Sections of the Guide

1. Conceptualising the research project
2. Establishing the project team
3. Developing a research methodology
4. Conducting field work
5. Producing outputs
6. Generating impact

Break out rooms

You will be divided into one of six groups that correspond to the stages of the research process. In your group, based on your research discuss what **challenges** you have experienced to make this particular part of the research inclusive and what you can do to **overcome** this? Make sure one of you takes notes and can feedback to the rest. The groups are:

1. Conceptualising the research project
2. Establishing the project team
3. Developing a research methodology
4. Conducting field work
5. Producing outputs
6. Generating impact
