

INNOVATING WITH NATURE

Nature-based solutions are designed to bring more nature and natural features and processes to cities, landscapes and seascapes. These innovative solutions also support economic growth, create jobs and enhance our well-being.

SSS9.21

Nature-based solutions in land and water management for hydro-meteorological risk reduction and climate change adaptation

Session aims:

- To give an overview of nature-based solutions that are inspired and supported by natural analogues
- Better understanding advantages and disadvantages of nature-based solutions, and of pilot-scale applications, reviews of previous case studies and developments of new theoretical/analytical tools and methods
