

13.11.2012/BS

## Swiss Hydrological Commission CHy

### Activities 2012

- Early Identification of Hydrological Research in Switzerland
  - Workshop and discussion within the hydrological research community in Switzerland on future needs, directions and structural developments of hydrological research in Switzerland
  - Drafting of recommendations for next steps
  - Drafting of a report by a consultant
  
- Conferences
  - June 8<sup>th</sup>, 2012 in Bern:  
Symposium on “Effects of climate change on water resources and waters” (in collaboration with Federal Office for the Environment FOEN and Swiss Society of Hydrology and Limnology SSSL).  
<http://www.bafu.admin.ch/wasser/01444/01991/10443/12202/index.html?lang=de>
  - November 17<sup>th</sup>, 2012 in Bern  
Symposium on “Advances in applied hydrology and limnology” at the 10<sup>th</sup> Swiss Geosciences Meeting (in collaboration with Swiss Society of Hydrology and Limnology SSSL). <http://geoscience-meeting.scnatweb.ch/sgm2012>
  - April 6-8, 2013 in Bern.  
Preparation of the International Conference “Hydrology Day 2013”, Topic: “Water resources and global change: Hydrological basic information – from measurement to application” (in collaboration with Federal Office for the Environment FOEN and Swiss Society of Hydrology and Limnology SSSL). In German language.

- Publications
  - Prozessbasierte Hochwasserabschätzung für mesoskalige Einzugsgebiete – Grundlagen und Interpretationshilfe zum Verfahren PREVAH-regHQ (Flood estimation for ungauged basins) by Daniel Viviroli and Rolf Weingartner. Beiträge zur Hydrologie der Schweiz, Nr. 39, 2012. (in collaboration with Swiss Society of Hydrology and Limnology SSSL and Institute of Geography, Hydrology Group, University of Bern)  
<http://www.hydrologie.unibe.ch/projekte/PREVAHregHQ.html>
  
- Web
  - Preparation of a web-portal “Water” in the frame of the new website of the Swiss Academy of Sciences SCNAT (in collaboration with all water related Associations of SCNAT)
